

## Emma Alexander – HCF Summer Intern 2021

Throughout this internship, I was given the amazing opportunity to see the ins and outs of Sidney Regional Medical Center. Through job shadowing many of the departments and their members. I have learned so much throughout this summer and I am extremely grateful to the Health Center Foundation and Sidney Regional Medical Center. I was allowed the experience to be submerged into clinical pharmacy, which was amazing. I am thankful for the exploration I was able to do in my future career. SRMC's Pharmacy department helped increase my passion for the world of pharmacy and what it truly means to be a pharmacist. I also enjoyed being in surgery. Observing all of the moving pieces that allow an operation room to run smoothly was electrifying. I was surrounded by impeccable medical providers everyday and learned so much from them.

Overall, I believe SRMC is a fantastic hospital with great staff and a small-town family feeling. While shadowing the multitude of different departments our hospital has to offer, I was amazed to see the amount of wonderful employees employed here. SRMC's team, as a whole, is fantastic! Our healthcare providers build relationships with the patients and provide excellent health care. The hospital staff is extremely patient, caring, and thorough when with their patients. I would be honored to be an employee and a patient here at SRMC. I will forever be grateful for this amazing opportunity and the knowledge I have acquired!
