

Maddy Watchorn – HCF Summer Intern 2021

I was very blessed to be chosen as an intern for the SRMC hospital. I was able to learn how different departments work individually and collectively. Through the experience, I was able to first-hand experience the miracle of life, ultrasound of twins, as well as experience the sorrow of death. Additionally, I was able to learn my true passions which helped me decide on a more specific career choice. I will never forget this internship and the stories I got to make during this amazing opportunity. They truly are some once in a lifetime experiences!!
